

RSNA 2025 PROGRAM

Cerebriu

Every patient diagnosed in time

Scientific PROGRAM

Monday

01

December

AI THEATRE
PRESENTATION

Towards Personalised Autonomous Brain MRI

12:30 - 12:50 AM

AI SHOWCASE
SOUTH HALL A

This talk will explore how AI can support technologists and radiologists in optimizing MRI acquisition through personalization and automation. Key use cases will include real-time protocol adaptation and making intra-scan decisions on gadolinium-based contrast agents (GBCAs). The session will dive into practical applications of AI that enhance workflow efficiency and improve diagnostic outcomes.

Akshay Pai

Chief Technology Officer - Cerebriu

Akshay Pai is the Chief Technology Officer at Cerebriu, where he leads the development of AI solutions for MRI. With a PhD in Medical Image Analysis, Akshay brings a deep expertise in artificial intelligence, machine learning, and healthcare technology. He has a proven track record of driving innovation in the medical field, focusing on applying AI to automate and optimize radiology processes. Akshay is passionate about bridging the gap between technology and healthcare to deliver solutions that empower healthcare professionals and streamline clinical decision-making. He is a lead inventor on multiple patents and has authored or co-authored over 50 research publications, contributing significantly to advancements in medical imaging and AI-driven healthcare technologies.
